Announcement: Damage following the Tohoku-Pacific Ocean Earthquake  
(Third Report)

First of all, we would like to express our heartfelt sympathy to the victims of the earthquake. Following on from the report issued on March 22, 2011, NOK Corporation hereby provides the latest information about its facilities affected by the earthquake.

1. NOK Group Facilities Located in the Devastated Areas

2. Human Injury  
As of the date of this announcement, no NOK employees have suffered serious injury due to the earthquake.

3. Damage to facilities/disruption to operations  
There was no serious damage to buildings or manufacturing facilities. Supplies of electricity, industrial water and other infrastructure suspended since the disaster have generally been resumed and it is now almost possible for the facilities to restart production. Some employees, however, still face difficulties in commuting to the facilities due to the shortage of gasoline.
4. Future measures
The facilities are beginning to manufacture and deliver products to meet the needs of customers. Pulling together across the entire company, we will make all-out efforts to normalize the situation in consideration of the availability of materials and the transport situation.

5. Influence on business performance
NOK is now in the process of calculating the financial impact of the disaster. If serious loss is estimated, the Company will make an immediate announcement to that effect.
