Report on the Damage Caused by the 2016 Kumamoto Earthquake (Third Issue)

We would like to offer our heartfelt condolences to those who have been affected by the Kumamoto Earthquake.
The following is the latest report on the impact of the earthquake on NOK Corporation.

1. Production base located in the affected area

<tbody>
<tr>
<td>Kumamoto Plant</td>
<td>Aso City, Kumamoto Prefecture</td>
<td>O rings</td>
</tr>
</tbody>
</table>

2. Safety of our employees
We confirmed safety of all our employees by April 18.

3. Damage to the plant
There is no severe damage to the buildings and production facilities, and the plant is now almost ready to resume production, with the supply of electricity and other utilities that had been stagnant since the 16th beginning to be recovered. However, some of the roads around the plant have not yet been restored to original state, making the commuting of employees and transportation of materials difficult. We are committing ourselves to resuming production and shipment step by step at the plant toward the goal of bringing it back to its full capacity operation, while giving first priority to safety.

4. Impact on our financial performance
The amount of damages caused by the earthquake is currently under investigation. If the impact on our financial performance is likely to be severe, it will be reported separately.
