The descriptions concerning projections of future business results, etc. are based on the information available as of the date of the preparation of this document and certain assumptions considered as reasonable. Actual business results may differ significantly from these projections depending on various factors. For details of assumptions and hypotheses for projections of business results, please refer to "Operating Results 1. Analysis of Operating Results (4) Outlook for fiscal 2007" on page 4.

Operating Results

1. Analysis of Operating Results

(1) Operating results for FY 2006

During this consolidated fiscal year, the Japanese economy continued its moderate recovery path. The world economy was also on a rising trend, led by the U.S. economy.

The automotive industry witnessed an increase in exports reflecting an expansion of overseas sales of Japanese cars, as well as the continued growth of production outside Japan. In the electronics equipment industry, while the Japanese market was sluggish in contrast to overseas production, which grew especially in China and other Asian countries.

Under these circumstances, the NOK group completed the final year of its Three-Year Management Plan, which started in fiscal 2004, with the objective of establishing a base for long-term stable growth. The slogan for such three-year plan was set as "Building up 'Global & GI.'"

"Global" included the aim of reinforcing overseas production and sales bases in order to respond to the needs of our customers, which have expanded on a global scale. Overseas sales for this consolidated fiscal year accounted for 39.7%, increasing by 12.3 points from three years earlier.

"GI" represents "General Industry," with a target for expansion of sales in the same industry. Sales for GI accounted for 25.4%, rising 6.3 points relative to three years earlier.

Given the aforementioned results, we believe that our slogan of "Building up 'Global & GI'" was implemented just as we had planned. Meanwhile, during the three-year period of the plan, we saw changes in prices and skyrocketing material prices that exceeded our initial expectations.

As a result, the business results for the NOK group were as follows: Sales amounted to 479,815 million yen (+6.5% y/y), operating income declined to 41,657 million yen (-8.0% y/y), ordinary profit was 45,399 million yen (-9.1% y/y), and net income fell to 24,793 million yen (-15.8% y/y).

(2) Performance by business category

[Seal Products Business]

In the area of production of four-wheel automobiles, the fuel-efficient Japanese cars showed robust growth in both export and the number of the locally manufactured cars, mainly in North America and Southeast Asia, thanks to surge in crude oil.

The volume of construction machinery produced also increased due to an increase in domestic private capital expenditure and an expansion in overseas construction demand. As a result, sales increased by 7.1% y/y to 212,336 million yen. Operating income also grew by 9.0% y/y to 17,466 million yen.

[FPC Business]

While domestic sales of FPC for mobile phones increased reflecting the growth of sales of multifunctional mobile phones, domestic sales as a whole decreased due to sluggish sales of the products for small-sized liquid crystal. Meanwhile, in the overseas market, not only sales of FPC for both hard disc drives (HDD) and mobile audio player increased, but also sales of FPC for mobile phones and digital cameras rose. As a result, sales increased by 8.2% y/y to 167,715 million yen. Operating income decreased by 20.1% y/y to 20,256 million yen, due mainly to fluctuations in prices.

[Other Business]

Sales of rubber rolls for office equipment declined due to lower prices, despite strong domestic demand. As to products other than rubber rolls for office equipment, sales expanded for production facilities and general industry machinery due to an increase in capital expenditure resulting from strong growth in the automotive industry and liquid crystal and semiconductor industry. Thus, sales and operating income increased to 99,763 million yen (+2.5% y/y) and 3,932 million yen (+3.1% y/y), respectively.

(3) Performance by location

In the domestic market, an increase in sales of seal products made up for the decrease in sales of FPC, resulting in domestic sales of 304,400 million yen (-0.3% y/y) and operating income of 24,864 million yen (+1.1% y/y).

In Asia, sales increased by 20.5% to 155,363 million yen while operating income declined by 19.2% to 16,099 million yen, respectively, reflecting the growth in both seal products and FPC.

(4) Outlook for fiscal 2007

The automotive industry worldwide has seen production remaining at a high level, driven by Japanese automotive manufactures. On the other hand, prices of materials such as steel continue to remain stubbornly high, and the requirements for quality have become more strenuous.

In the electronics equipment industry, while the market continues to expand mainly outside Japan, competition for lowering prices has rapidly and globally become more intense. To deal with such circumstances, we transferred NOK's FPC sales division for electronics equipment to a manufacturing subsidiary (Nippon Mektron, Ltd.) on October 1, 2006, in order to respond more quickly to the market.

In addition, two subsidiaries (HOKUSHIN CORPORATION and NITTO KOGYO CORPORATION) businesses centering on rubber rolls for business equipment, merged on April 1, 2007, with the objective of more efficient operations, and started business operations under the name of SYNZTEC CO., LTD.

Under these circumstances, the next fiscal year will be the first of the new Three-Year Management Plan. (Please refer to "Mid- to Long-Term Management Strategies and Challenges" in "The Status of the NOK Group".) We will focus our efforts on securing implementation of measures to strengthen the competitive edge of each of our businesses to become a mid-sized excellent company in the global market as announced in our slogan.

Furthermore, the NOK group as a whole will continue to strengthen its efforts in expansion of sales, improvement of quality, and cost reduction to reinforce profitability and our corporate structure.

We anticipate sales of 510.0 billion yen (+6.3% y/y), operating income of 44.5 billion yen (+6.8% y/y), ordinary profit of 47.5 billion yen (+4.6% y/y) and net income of 26.5 billion yen (+6.9% y/y) on a consolidated basis for fiscal 2007.

The above projections include prospects calculated on the basis of the latest data available. Actual business results may differ from these projections depending on future operations and other domestic and overseas situations, such as fluctuations in foreign exchange rates.

2. Analysis of Financial Position

(1) Assets, liabilities and net assets

Total assets as of the end of this consolidated fiscal year were 508,021 million yen, an increase of 37,006 million yen from a year earlier. This mainly reflects an increase in inventories, continued growth in capital expenditure, such as tangible fixed assets for reinforcement of the domestic and overseas production capacities, and an increase in investment securities due to a change in market values. Total liabilities stood at 228,371 million yen, an increase of 5,032 million yen from the end of the previous consolidated fiscal year. This is principally due to an increase in the accrued amount payable for domestic and overseas capital expenditure. Net assets amounted to 279,650 million yen, fueled by net income of 24,793 million yen, etc., driving up the capital ratio to 50.7%.

(2) Cash Flows

The balance of cash and cash equivalents (hereinafter, "fund") as of the end of the consolidated fiscal 2006 decreased by 1,783 million yen on a year-on-year basis. Cash flow status for the consolidated fiscal 2006 is as stated below:

[Cash flows from operating activities]

The fund generated from operating activities was 44,572 million yen (a decrease of 15.3% y/y). This is attributable to an increase in income taxes paid, despite an increase in notes discounted.

[Cash flows from investing activities]

The fund used in investing activities amounted to 43,003 million yen (a decrease of 0.4% y/y). This reflects investments such as acquisition of tangible fixed assets with the objective of strengthening production capacity both at home and abroad.

[Cash flows from financing activities]

The fund used in financing activities amounted to 5,896 million yen (a decrease of 42.6% y/y). This is mainly attributable to repayment of long-term borrowings, in addition to execution of short-term borrowings for payment of income taxes.

The trend of cash flow indicators is as follows:

	FY 2003	FY 2004	FY 2005	FY 2006
Capital ratio (%)	40.0	43.4	48.5	50.7
Capital ratio on market value (%)	181.1	105.8	116.4	68.3
Cash flow ratio to interest-bearing liabilities	1.3	1.3	1.2	1.5
Interest coverage ratio	29.6	37.6	37.5	24.2

Capital ratio = Shareholders' equity / Total assets

Capital ratio on market value = Total market capitalization / Total assets

Cash flow ratio to interest-bearing liabilities = Interest-bearing liabilities / Cash flows from operating activities

Interest coverage ratio = Cash flows from operating activities / Interest paid

- All indices above are calculated based on consolidated financial statements.
- Total market capitalization is calculated on the following formula: the closing stock price on the last day of the fiscal year multiplied by the number of issued and outstanding shares as of the end of the fiscal year.
- Cash flows are calculated with cash flows from operating activities. Interest-bearing liabilities represent the liabilities on the consolidated balance sheet on which we pay interest.

3. Principal Policy on Profit Sharing, and Dividends for this Fiscal Year and the Next Fiscal Year

Our basic policy on profit sharing to the shareholders is to maintain stable dividend payments at appropriate levels in concert with mid- to long-term corporate performance. On the other hand, however, internal reserves are also an important factor to be considered for future business development and reinforcement of financial health. We will determine dividends taking into consideration all such factors.

Taking into consideration the corporate performance based on the aforementioned policy, the dividend for this fiscal year will be 20 yen per share (10 yen as interim dividend plus 10 yen as term-end dividend), maintaining the same amount of annual dividend as in the previous fiscal year. For the following fiscal year, we expect to pay a dividend of 20 yen per share. However, our final decision will be subject to the financial position and operating results, etc. in accordance with the policy as described above.

4. Risk Factors in Business

The NOK group's business performance and financial position are exposed to various risks. The following is a discussion of assumed main risks that the NOK group may face in its business activities. In addition, the future events contained in these items were envisioned as of the end of this fiscal term (March 31, 2007).

(1) Risks in Seal Products Business

The automotive industry is our biggest buyer, which accounts for about 70 percent of sales in this product line, and sales performance is subject to trends in production and sales activities within the industry. In the automotive industry, domestic manufacturers have increasingly shifted their production lines overseas.

Under these circumstances, automotive parts suppliers, including the NOK group, have increasingly received requests from the automotive industry, to offer drastic cost reduction, technological innovation, and a global response, not to mention improvements in quality and strict observance of delivery times. Consequently, the NOK group may be adversely affected by these trends in the future.

Moreover, while oil seal products, one of our core products, are used for the internal-combustion engine, battery-driven electric vehicles are under developed in recent years. The NOK group is undertaking research and development efforts on new products to equip electric-powered vehicles in the expectation that they will become more common in the future. However, at this time, it is difficult to foresee the influence of battery-driven electric vehicles on the future business results of the NOK group.

(2) Risks in Flexible Printed Circuit Business

Given that the products in this business are characterized by short lifecycles and rapid technical innovation, and that business performance tends to fluctuate significantly subject to trends in the supply-demand relationship, this field may produce an adverse effect on the business performance of the NOK group. As countermeasures against such a risk, we transferred our FPC sales division for the electronic equipment industry to Nippon Mektron, Ltd. with effect from October 1, 2006, with the aim of providing prompt customer services and higher quality products. In addition, as South Korean and Taiwanese manufacturers are gaining market shares in this business field through the improvement of technical levels and the expansion of production capacity, such tough competition may have a major impact on the business results of the NOK group.

(3) Risks in Other Business

The NOK group has been engaged in the production and sale of special lubricants, chemical products and mechanical face seals. Furthermore, with an eye to ensuring a stable business base by developing a third core business alongside seal products and flexible printed circuit businesses, we acquired HOKUSHIN CORPORATION in March 2004, and NITTO KOGYO CORPORATION in March 2005, making them our subsidiaries that possess business base centering on the production of rubber rolls for copiers. We merged these two subsidiaries into one unit on April 1, 2007, commencing business operations under the name of SYNZTEC CO., LTD. As the technology innovation and competition become more intense as a result of progress in color copiers, we may face adverse effects brought by such trends in this new business area.

(4) Risks in Production Structure

As a parts manufacturing company, the NOK group has established a production structure in line with our basic policy of keeping pace with domestic customers' shift to overseas production. In recent years, the overseas production ratio of the NOK group has shown a tendency to go up in accordance with customers' shift to overseas production.

In the future, we plan to raise overseas production ratio further with a focus on production expansion in the Asian area in line with domestic automotive manufacturers' shift to overseas production in the seal business. A further expansion of overseas production is also expected in the flexible printed circuit business. In light of this, the business results of the NOK group will become vulnerable to foreign exchange fluctuations and the business climate of each country where NOK deploys its production facilities.

(5) Risks in business relationship with Freudenberg & Co.

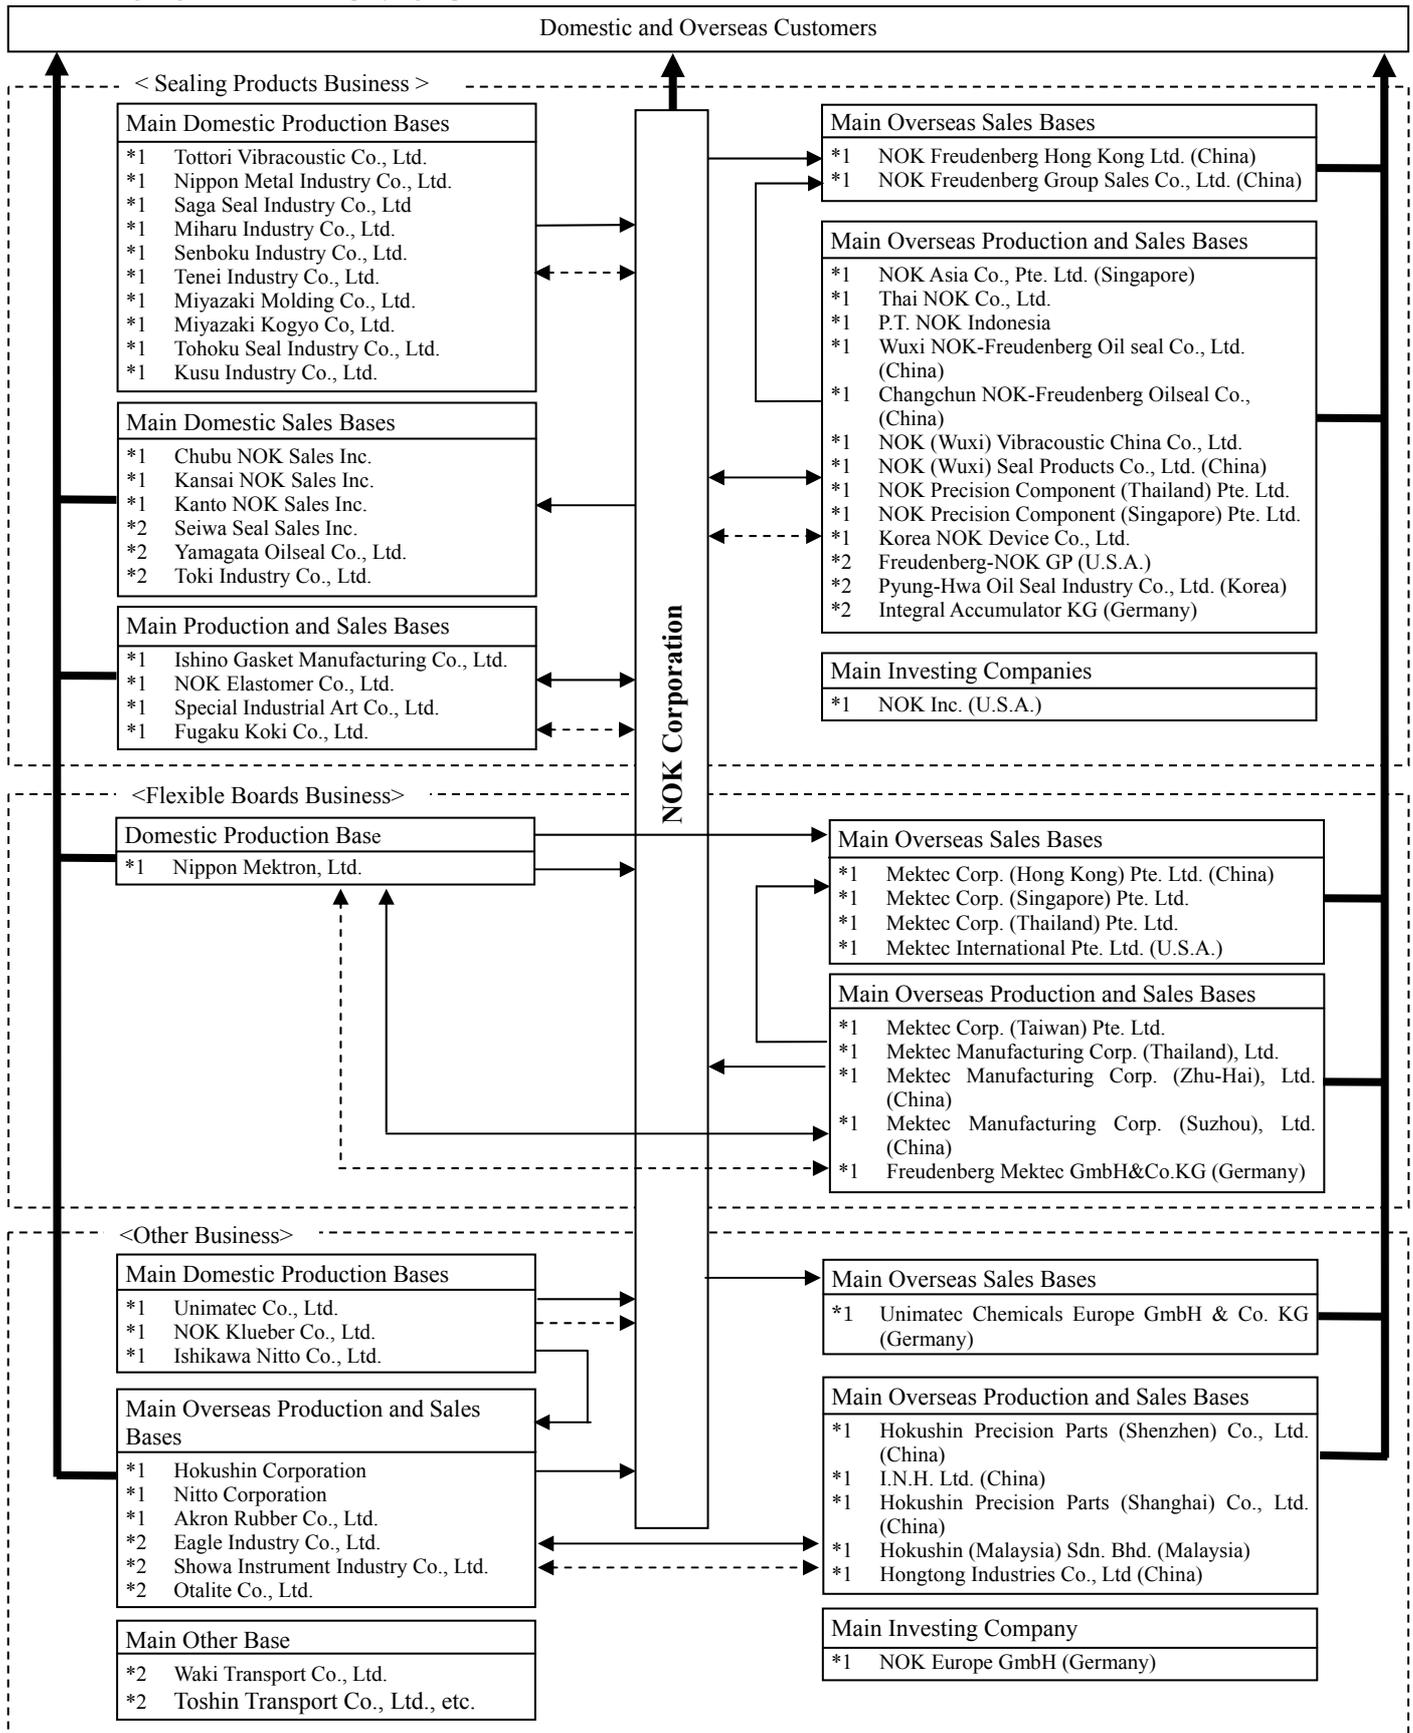

NOK has maintained capital and technical alliances with Freudenberg & Co. ("Freudenberg") since 1960. Also, Freudenberg (including its group companies) plays an important role as a partner for the NOK group's business activities.

Currently, Freudenberg is the largest stockholder, holding 22.3% of outstanding and issued shares of NOK through Freudenberg Beteiligings GmbH, Freudenberg's investment company, continuing the NOK group's relationship with Freudenberg begun with the first alliance agreement concluded in 1960. We believe that both groups will continue to develop their stable relationship in the future. However, any change in business alliances or any strategic shift of Freudenberg may have a significant impact on the business results of the NOK group.

Management Policy

1. Principal Management Policy

It is our basic concept that a firm is the common asset of its shareholders, employees, and society. At the same time, the goal of NOK is to become an entity in which all of its stakeholders including customers, suppliers, and financial institutions can take pride. For such purposes, we concentrate our efforts to create a vigorous, high profitability corporate group through “manufacturing and distributing unique and useful products with high technical capabilities throughout the world and at appropriate prices.” That is the main policy with which NOK conducts its business.

2. Mid- to Long-Term Management Strategies

We started our New Three-Year Management Plan from fiscal 2007. The outline of this plan is as follows:

1. Slogan: “Toward a Mid-sized Excellent Company in the Global Market – For Higher S.S.”*1
2. Period: From April 1, 2007 to March 31, 2010 (FY 2007 to FY 2009)
3. Basic policies:
 - (1) To implement a business management respecting human dignity
 - (2) To restructure “NOK, renowned for quality”
 - (3) To increase new order receipts in the joint efforts of sales, technical and production divisions.*2
 - (4) To strengthen the capabilities of each division
 - (5) To foster and reinforce the rubber roll business
 - (6) To improve and strengthen the global production system
 - (7) To improve consolidated profitability and the financial structure by establishing a group management system
 - (8) To grow as a corporate citizen
4. Target indicators (Goals for the final consolidated fiscal year of the plan)

Net sales:	600 billion yen
Operating income:	62.0 billion yen
ROA:	6.6%

Notes: *1 S.S. = Stakeholder Satisfaction.

*2 Each division responsible for sales, technical matters, and production.

The above target indicators for future business results include all the risk factors envisaged as of the date of publication of this document. However, actual results may differ depending on the domestic and overseas economic situation, price of materials, demand, competition from other companies, changes in technologies, and other factors, including fluctuations in foreign exchange rates.

Important Accounting Guidelines for the Preparation of Consolidated Financial Statements

Matters other than those described in “Changes in the Significant Matters for Preparation of Consolidated Financial Statements” below are not disclosed in this document, as there are no significant changes in descriptions in the latest Securities Report submitted on June 29, 2006.

Changes in the Significant Matters for Preparation of Consolidated Financial Statements

1. Accounting standard concerning bonus for directors

The Company adopted “Accounting Standard Concerning Bonus for Directors” (“Corporate Accounting Standards No.4” issued on November 29, 2005) from this fiscal year.

As a result, operating income, ordinary profit, and income before taxes decreased 341 million yen each.

2. Accounting standards regarding disclosure of net assets in the balance sheet

The Company adopted “Accounting Standards Regarding Disclosure of Net Assets in the Balance Sheet” (“Corporate Accounting Standards No.5” issued on December 9, 2005) and “Guidance on Application of Accounting Standards Regarding Disclosure of Net Assets in the Balance Sheet” (“Application Guidance No.8 on Accounting Standards” issued on December 9, 2005) from this fiscal year.

The amount of Shareholders’ equity would have been 257,598 million yen under the previous year’s presentation.

The item “Net assets” in the consolidated balance sheet for this fiscal year was prepared in accordance with the amended Standards for Preparation of Consolidated Financial Statements reflecting the amendment to the Standards for Preparation of Consolidated Financial Statements.
